INDEX TO VOLUME XLVII.

ABSORPTION of calcium salts in man, note on, 3

Acid, dinitrosalicylic, a reagent for the estimation of sugar in normal and diabetic urine, 5

——, hydrochloric, ingestion, effect upon the composition of the urine in man, 315

——, phosphoric, and calcium, distribution in the blood of normal children, 321

——, ——, distribution in the blood of normal infants, 53

Acids, dicarboxylic, hydrolysis of the esters of some, by the lipase of the liver, 495

ADOLPH, EDWARD F., and FERRY, RONALD M. The oxygen dissociation of hemoglobin, and the effect of electrolytes upon it, 547

Alkali, blood, and respiration during carbon monoxide asphyxia, 421

Analogy, *in vitro*, of antiketogenesis, 433

Analysis apparatus, improved Haldane gas, and a simple laboratory gas meter, 489

——, certain biochemical methods of substitution of turbidimetry for nephelometry, 27

——, gas, sampling bottle for, 281

Antiketogenesis, 433, 449

Antiketogenetic balance in man, ketogenetic, 449

Antiscorbutic vitamine, effect of heat and oxidation upon, 483

Apparatus for reducing milk, fruit juices, and other fluids to a powder without destruction of vitamines, methods of extracting and concentrating vitamines A, B, and C together with, 411

Apparatus, improved Haldane gas analysis, and a simple laboratory gas meter, 489

—— used in determining the respiratory exchange in man, notes on, 277, 281

Arginine and cystine as precursors of creatine, 33

Asphyxia, carbon monoxide, respiration and blood alkali during, 421

Autolysis of brain, 333

——, studies of, 333

BAILEY, CAMERON V. Notes on apparatus used in determining the respiratory exchange in man. I. An adaptation of the French gas mask for use in respiratory work, 277. II. A sampling bottle for gas analysis, 281

Basal metabolism, influence of colloidal iron on, 557

—— —— of normal women, 69

Beans, Chinese and Georgia velvet, relative digestibility of various preparations of the proteins from, 285

Benzidine method, determination of inorganic sulfate, total sulfate, and total sulfur in urine, 59

Biochemical methods of analysis, substitution of turbidimetry for nephelometry, 27

Blood alkali and respiration during carbon monoxide asphyxia, 421

Blood constituents, certain common, effect of muscular exercise upon, 565
—— of normal children, distribution of calcium and phosphoric acid in, 321
—— —— —— infants, distribution of phosphoric acid in, 53
—— serum, diffusible calcium of, a method for its determination, 529
Bloor, W. R. See McKellips, De Young, and Bloor, 53
Blunt, Katharine, and Dye, Marie. Basal metabolism of normal women, 69
Boutwell, P. W. See Steenbock, Sell, and Boutwell, 303
Bradley, H. C. See Gibson, Umbreit, and Bradley, 333
Brain, autoloysis of, 333
Buell, Mary V. See Steenbock, Sell, and Buell, 89

Calcium and magnesium in small amounts of serum, a simple technique for the determination, 475
—— —— phosphoric acid distribution in the blood of normal children, 321
——, diffusible, of the blood serum, a method for its determination, 529, 541
—— salts in man, note on the absorption, 3
Calorimetry, animal, 557
Carbon dioxide, relation of migration of ions between cells and plasma to the transport of, 377
—— monoxide asphyxia, respiration and blood alkali during, 421
Catalase reaction, study of, 341
Cells and plasma, relation of migration of ions between, to the transport of carbon dioxide, 377
Cereal and legume seeds, supplementary dietary relations between animal tissues and, 139
—— grains, proteins of, supplementary dietary relations between the potato and, 175
—— —— supplementary relations of cereal grains with, with respect to improvement in the quality of their proteins, 207
—— ——, —— relations of legume seed with, with respect to improvement in the quality of their proteins, 207
——, supplementary relations of the proteins of milk for those of, and of milk for those of legume seeds, 235
Chapin, Robert M. The determination of cresol by the phenol reagent of Folin and Denis, 309
Chemical factors in fatigue, 565
Chinese and Georgia velvet beans, relative digestibility of various preparations of the proteins from, 285
Christman, Adam A., and Lewis, Howard B. Lipase studies. I. The hydrolysis of the esters of some dicarboxylic acids by the lipase of the liver, 495
Clark, E. P. Preparation of galactose, 1
Colloidal iron on basal metabolism, influence, 557
Colorimeter, nephelometer-, further improvements, 19
Constituents, certain common blood, effect of muscular exercise upon, 565
Creatine, arginine and cystine as precursors of, 33
Creatinuria, 33, 45
——, effect of thyroid feeding upon, 45
Cresol, determination by the phenol reagent of Folin and Denis, 309

Cystine and arginine as precursors of creatine, 33

DENIS, W. On the substitution of turbidimetry for nephelometry in certain biochemical methods of analysis, 27
—— and Folin's phenol reagent, determination of cresol by, 309
Determination, gasometric, of nitrogen, 11
——, ——, of urea in urine, 13
—— of calcium and magnesium in small amounts of serum, a simple technique for, 475
—— —— cresol by the phenol reagent of Folin and Denis, 309
—— —— inorganic sulfate, total sulfate, and total sulfur in urine by the benzidine method, 59
—— —— sugar in normal and diabetic urine, dinitrosalicylic acid as a reagent, 5
—— —— the diffusible calcium of the blood serum, a method for, 529
—— —— —— respiratory exchange in man, notes on apparatus used in, 277, 281
DEYOUNG, I. M. See MCKELLIPS, DE YOUNG, and BLOOR, 53
Diabetic urine, dinitrosalicylic acid as a reagent for the estimation of sugar in, 5
Dicarboxylic acids, hydrolysis of esters of some, by the lipase of the liver, 495
Diet, deficient in vitamine A, failure of rats to develop rickets on, 395
Dietary relations between the proteins of the cereal grains and the potato, 175
—— ——, supplementary, between animal tissues and cereal and legume seeds, 139
Diets low in phosphorus and fat-soluble A, production of rickets by, 507
Diffusible calcium of the blood serum, a method for its determination, 529
Digestibility of proteins *in vitro*, studies on, 285
——, relative, of various preparations of the protein from the Chinese and Georgia velvet beans, 285
Dinitrosalicylic acid, a reagent for the estimation of sugar in normal and diabetic urine, 5
DOISY, EDWARD A., and EATON, EMILY P. The relation of the migration of ions between cells and plasma to the transport of carbon dioxide, 377
DUTCHER, R. ADAMS, HARSHAW, H. M., and HALL, J. S. Vitamine studies. VIII. The effect of heat and oxidation upon the antiscorbutic vitamine, 483
DYE, MARIE. See BLUNT and DYE, 69

EATON, EMILY P. See DOISY and EATON, 377
EDDY, WALTER H., HEFT, HATTIE L., STEVENSON, HELEN C., and JOHNSON, RUTH. Studies in the vitamine content. II. The yeast test as a measure of vitamine B, 249
Electrolytes upon the oxygen dissociation of hemoglobin, 547
Esters of some dicarboxylic acids, hydrolysis of, by the lipase of the liver, 495
Exercise, muscular, effect upon certain common blood constituents, 565

FATIGUE, chemical factors in, 565
Fats, animal, fat-soluble vitamine and yellow pigmentation in, with some observations on its stability to saponification, 89

Fat-soluble A and phosphorus, diets low in, production of rickets by, 507
—— vitamine, 89, 303
—— —— and yellow pigmentation in animal fats with some observations on its stability to saponification, 89
—— —— content of peas in relation to their pigmentation, 303
Feeding, thyroid, effect upon creatinuria, 45
FERRY, RONALD M. See ADOLPH and FERRY, 547
FISKE, CYRUS H. The determination of inorganic sulfate, total sulfate, and total sulfur in urine by the benzidine method, 59
Folin and Denis' phenol reagent, determination of cresol by, 309
Foods, supplementary protein values in, 111, 139, 175, 207, 235

GALACTOSE, preparation, 1
Gas analysis apparatus, Haldane, improved, and a simple laboratory gas meter, 489
——, ——, sampling bottle for, 281
—— mask, French, for use in respiratory work, an adaptation, 277
——meter, simple laboratory, and an improved Haldane gas analysis apparatus, 489
Gasometric determination of nitrogen, 11
—— —— —— urea in urine, 13
Georgia and Chinese velvet beans, relative digestibility of various preparations of the proteins from, 285
GIBSON, CHARLES A., UMBREIT, FREDA, and BRADLEY, H. C. Studies of autolysis. VII. Autolysis of brain, 333
Grain, cereal, proteins of, supplementary dietary relations between the potato and, 175
——, ——, supplementary relations of cereal grain with, with respect to improvement in the quality of their proteins, 207
——, ——, —— relations of legume seed with, with respect to improvement in the quality of their proteins, 207
GROSS, E. G., and STEENBOCK, H. Creatinuria. II. Arginine and cystine as precursors of creatine, 33. III. The effect of thyroid feeding upon creatinuria, 45

HAGGARD, HOWARD W., and HENDERSON, YANDELL. Hemato-respiratory functions. XII. Respiration and blood alkali during carbon monoxide asphyxia, 421
Haldane gas analysis apparatus, improved, and a simple laboratory gas meter, 489
HALL, J. S. See DUTCHER, HARSHAW, and HALL, 483
HARSHAW, H. M. See DUTCHER, HARSHAW, and HALL, 483
Heat and oxidation, effect upon the antiscorbutic vitamine, 483
HEFT, HATTIE L. See EDDY, HEFT, STEVENSON, and JOHNSON, 249
Hemato-respiratory functions, 421
Hemoglobin, oxygen dissociation of, and the effect of electrolytes upon it, 547
HENDERSON, YANDELL. See HAGGARD and HENDERSON, 421
HESS, A. F., MCCANN, G. F., and PAPPENHEIMER, A. M. Experimental rickets in rats. II. The failure of rats to develop rickets on a diet deficient in vitamine A, 395

Hydrochloric acid ingestion, effect upon the composition of the urine in man, 315
Hydrolysis of the esters of some dicarboxylic acids by the lipase of the liver, 495
HYNES, WALTER A. See SHERWIN and HYNES, 297

INGESTION, hydrochloric acid, effect upon the composition of the urine in man, 315
Inorganic sulfate, total sulfate, and total sulfur in urine determination, by the benzidine method, 59
In vitro analogy of antiketogenesis, 433
—— ——, digestibility of proteins, studies on, 285
Ions, relation of migration of, between cells and plasma to the transport of carbon dioxide, 377
Iron, colloidal, influence on basal metabolism, 557

JOHNSON, RUTH. See EDDY, HEFT, STEVENSON, and JOHNSON, 249
JONES, D. BREESE. See WATERMAN and JONES, 285
JONES, MARTHA R., and NYE, LILLIAN L. The distribution of calcium and phosphoric acid in the blood of normal children, 321

KETOGENETIC antiketogenetic balance in man, 449
KLETT, ROBERT E. See KOBER and KLETT, 19
KOBER, PHILIP ADOLPH, and KLETT, ROBERT E. Further improvements in the nephelometer-colorimeter, 19
KRAMER, BENJAMIN, and TISDALL, FREDERICK F. A simple technique for the determination of calcium and magnesium in small amounts of serum, 475

LANGFELDT, EINAR. Animal calorimetry. Seventeenth paper. The influence of colloidal iron on the basal metabolism, 557
Legume seeds and cereal, supplementary dietary relations between animal tissues and, 139
—— ——, supplementary relations of cereal grain with, with respect to improvement in the quality of their proteins, 207
—— ——, —— relations of legume seed with, with respect to improvement in the quality of their proteins, 207
—— ——, —— relations of the proteins of milk for those of, and of milk for those of cereals, 235
LEWIS, HOWARD B. See CHRISTMAN and LEWIS, 495
Lipase of the liver, hydrolysis of the esters of some dicarboxylic acids by, 495
—— studies, 495
Liver, lipase of, hydrolysis of the esters of some dicarboxylic acids by, 495

MAGNESIUM and calcium in small amounts of serum, a simple technique for the determination, 475
Mask, French gas, for use in respiratory work, an adaptation, 277
MASON, EDWARD H. A note on the absorption of calcium salts in man, 3
MCCANN, G. F. See HESS, MCCANN, and PAPPENHEIMER, 395

McCann, G. F. See von Meysenbug and McCann, 541
McCarty, Arthur C. See Stehle and McCarty, 315
McClendon, J. F. Methods of extracting and concentrating vitamines A, B, and C, together with an apparatus for reducing milk, fruit juices, and other fluids to a powder without destruction of vitamines, 411
McCollum, E. V., Simmonds, Nina, and Parsons, H. T. Supplementary protein values in foods. I. The nutritive properties of animal tissues, 111. II. Supplementary dietary relations between animal tissues and cereal and legume seeds, 139. III. The supplementary dietary relations between the proteins of cereal grains and the potato, 175. IV. The supplementary relations of cereal grain with cereal grain; legume seed with legume seed; and cereal grain with legume seed, with respect to improvement in the quality of their proteins, 207. V. Supplementary relations of the proteins of milk for those of cereals and of milk for those of legume seeds, 235
——, ——, Shipley, P. G., and Park, E. A. Studies on experimental rickets. VIII. The production of rickets by diets low in phosphorus and fat-soluble A, 507
McKellips, G. M., De Young, I. M., and Bloor, W. R. The distribution of phosphoric acid in the blood of normal infants, 53
Metabolism, basal, influence of colloidal iron on, 557
Metabolism, basal, of normal women, 69
—— of nitrobenzaldehydes and nitrophenylacetaldehyde, 297
Meter, simple laboratory gas, and an improved Haldane gas analysis apparatus, 489
Method, benzidine, determination of inorganic sulfate, total sulfate, and total sulfur in urine by, 59
—— for the determination of diffusible calcium of the blood serum, 529
Methods, biochemical, of analysis, substitution of turbidimetry for nephelometry in certain, 27
—— of extracting and concentrating vitamines A, B, and C together with an apparatus for reducing milk, fruit juices, and other fluids to a powder without destruction of vitamines, 411
Milk, fruit juices, and other fluids, apparatus for reducing, to a powder without destruction of vitamines, methods of extracting and concentrating vitamines A, B, and C together with, 411
——, supplementary relations of the proteins of, for those of cereals, and of milk for those of legume seeds, 235
——, —— —— of the proteins of, for those of legume seeds, and those of milk for those of cereals, 235
Morgulis, Sergius. A study of the catalase reaction, 341
Murray, Marjorie F. See von Meysenbug, Pappenheimer, Zucker, and Murray, 529
Muscular exercise, effect upon certain common blood constituents, 565

NEPHELOMETER-COLORIMETER, further improvements, 19
Nephelometry substituted by turbidimetry in certain biochemical methods of analysis, 27
NEWCOMER, H. S. A simple laboratory gas meter and an improved Haldane gas analysis apparatus, 489
Nitrobenzaldehydes and nitrophenylacetaldehyde, metabolism of, 297
Nitrogen, gasometric determination, 11
Nitrophenylacetaldehyde and nitrobenzaldehyde, metabolism of, 297
Nutritive properties of animal tissues, 111
NYE, LILLIAN L. See JONES and NYE, 321

OXIDATION and heat, effect upon the antiscorbutic vitamine, 483
Oxygen dissociation of hemoglobin and the effect of electrolytes upon it, 547

PAPPENHEIMER, A. M. See HESS, MCCANN, and PAPPENHEIMER, 395
——. See VON MEYSENBUG, PAPPENHEIMER, ZUCKER, and MURRAY, 529
PARK, E. A. See MCCOLLUM, SIMMONDS, SHIPLEY, and PARK, 507
PARSONS, H. T. See MCCOLLUM, SIMMONDS, and PARSONS, 111, 139, 175, 207, 235
Peas, fat-soluble vitamine content of, in relation to their pigmentation, 303
Phenol reagent of Folin and Denis, determination of cresol by, 309
Phosphoric acid and calcium, distribution in the blood of normal children, 321
—— ——, distribution in the blood of normal infants, 53
Phosphorus and fat-soluble A, diets low in, production of rickets, by, 507
Pigmentation, fat-soluble content of peas in relation to, 303
——, yellow, and fat-soluble vitamine in animal fats with some observations on its stability to saponification, 89
Plasma and cells, relation of migration of ions between, to the transport of carbon dioxide, 377
Potato, supplementary dietary relations between the proteins of the cereal grains and, 175
Precursors of creatine, arginine and cystine as, 33
Protein values in foods, supplementary, 111, 139, 175, 207, 235
Proteins, digestibility of, *in vitro*, studies on, 285
—— from the Chinese and Georgia velvet beans, the relative digestibility of various preparations of, 285
—— of milk, supplementary relations of, for those of cereals and of milk for those of legume seeds, 235
—— —— the cereal grains, supplementary dietary relations between the potato and, 175

RAKESTRAW, NORRIS W. Chemical factors in fatigue. I. The effect of muscular exercise upon certain common blood constituents, 565
Reaction, catalase, study of, 341
Reagent, dinitrosalicylic acid, for the estimation of sugar in normal and diabetic urine, 5

Reagent, phenol, of Folin and Denis, determination of cresol by, 309
Respiration and blood alkali during carbon monoxide asphyxia, 421
Respiratory exchange in man, notes on apparatus used in determining, 277, 281
—— functions, hemato-, 421
—— work, an adaptation of the French gas mask for use in, 277
Rickets, experimental, in rats, 395
——, ——, studies on, 507
——, failure of rats to develop, on a diet deficient in vitamine A, 395
——, human, and experimental dog tetany, 541
——, production by diets low in phosphorus and fat-soluble A, 507

SALTS, calcium, in man, note on the absorption, 3
Sampling bottle for gas analysis, 281
Saponification, fat-soluble vitamine and yellow pigmentation in animal fats with some observations on its stability to, 89
——, —— —— stability to, some observations on, 89
Seed, legume, and cereal, supplementary dietary relations between animal tissues and, 139
——, ——, supplementary relations of cereal grain with, with respect to improvement in the quality of their proteins, 207
——, ——, —— relations of legume seed with, with respect to improvement in the quality of their proteins, 207
——, ——, —— relations of the proteins of milk for those of, and of milk for those of cereals, 235
SELL, MARIANA T. See STEENBOCK, SELL, and BUELL, 89
——. See STEENBOCK, SELL, and BOUTWELL, 303
Serum, blood, diffusible calcium of, a method for its determination, 529
——, determination of calcium and magnesium in small amounts of, a simple technique for, 475
SHAFFER, PHILIP A. Antiketo-genesis. I. An *in vitro* analogy, 433. II. The ketogenic antiketogenic balance in man, 449
SHERWIN, CARL P., and HYNES, WALTER A. The metabolism of nitrobenzaldehydes and nitrophenylacetaldehyde, 297
SHIPLEY, P. G. See MCCOLLUM, SIMMONDS, SHIPLEY, and PARK, 507
SIMMONDS, NINA. See MCCOLLUM, SIMMONDS, and PARSONS, 111, 139, 175, 207, 235
——. See MCCOLLUM, SIMMONDS, SHIPLEY, and PARK, 507
STEENBOCK, H., SELL, MARIANA T., and BUELL, MARY V. Fat-soluble vitamine. VII. The fat-soluble vitamine and yellow pigmentation in animal fats with some observations on its stability to saponification, 89. VIII. The fat-soluble vitamine content of peas in relation to their pigmentation, 303
——. See GROSS and STEENBOCK, 33, 45
STEHLE, RAYMOND L. The gasometric determination of urea in urine, 13
——. Note on the gasometric determination of nitrogen, 11
—— and MCCARTY, ARTHUR C. The effect of hydrochloric acid ingestion upon the composition of the urine in man, 315
STEVENSON, HELEN C. See EDDY, HEFT, STEVENSON, and JOHNSON, 249

Sugar in normal and diabetic urine, dinitrosalicylic acid as a reagent for the estimation, 5
Sulfate, inorganic and total, and total sulfur in urine, determination by the benzidine method, 59
Sulfur, total, inorganic sulfate, and total sulfate in urine, determination by the benzidine method, 59
SUMNER, JAMES B. Dinitrosalicylic acid: A reagent for the estimation of sugar in normal and diabetic urine, 5

TEST, yeast, as a measure of vitamine B, 249
Tetany, experimental dog, and human rickets, 541
Thyroid feeding upon creatinuria, effect, 45
TISDALL, FREDERICK F. See KRAMER and TISDALL, 475
Tissues, animal, nutritive properties, 111
——, ——, supplementary dietary relations between cereal and legume seeds and, 139
Turbidimetry for nephelometry in certain biochemical methods of analysis, substitution, 27

UMBREIT, FREDA. See GIBSON, UMBREIT, and BRADLEY, 333
Urea in urine, gasometric determination, 13
Urine, composition in man, effect of hydrochloric acid ingestion upon, 315
——, determination of inorganic sulfate, total sulfate, and total sulfur in, by the benzidine method, 59
——, diabetic and normal, dinitrosalicylic acid as a reagent for the estimation of sugar in, 5
Urine, gasometric determination of urea in, 13
——, normal and diabetic, dinitrosalicylic acid as a reagent, for the estimation of sugar in, 5

VITAMINE A, failure of rats to develop rickets on a diet deficient in, 395
——, antiscorbutic, effect of heat and oxidation upon, 483
—— B, yeast test as a measure of, 249
—— content, fat-soluble, of peas in relation to their pigmentation, 303
———, studies in, 249,
——, fat-soluble, 89, 303
——, ——, and yellow pigmentation in animal fats with some observations on its stability to saponification, 89
—— studies, 483
Vitamines A, B, and C, methods of extracting and concentrating, together with an apparatus for reducing milk, fruit juices, and other fluids to a powder without destruction of vitamines, 411
——, apparatus for reducing milk, fruit juices, and other fluids to a powder without destruction of, together with methods of extracting and concentrating vitamines A, B, and C, 411
VON MEYSENBUG, L., and MCCANN, G. F. The diffusible calcium of the blood serum. II. Human rickets and experimental dog tetany, 541
——, PAPPENHEIMER, A. M., ZUCKER, T. F., and MURRAY, MARJORIE F. The diffusible calcium of blood serum. I. A method for its determination, 529

WATERMAN, HENRY C., and JONES, D. BREESE. Studies on the digestibility of proteins *in vitro*. II. The relative digestibility of various preparations of the proteins from the Chinese and Georgia velvet beans, 285

YEAST test as a measure of vitamine B, 249
